Detailed Description

- Web based with online accounts.
- Project creation/user roles.
- Multiple project dashboard
- Tasks and Milestones
- Time management driven
- Secure online system

Management Plan

Dates	Week #	Focus	Description
09/18/2014-09/25/2014	4	Project Proposal	Create project proposal and present it to class.
09/25/2014-10/02/2014 10/02/2014-10/07/2014	5, 6	Personal Projects	Create the complete data model in the database. Enable user registration and personal project tracking capabilities (user can create stories, task, etc.).
10/07/2014-10/16/2014 10/16/2014-10/23/2014 10/23/2014-10/30/2014	7, 8, 9	Group Projects	Iteration 1 is complete. Present. Begin development on the “group” functionality. Users can invite more users to join their project. Projects will have auth. security based on roles (e.g. change your own tasks, etc.). Users can assign all aspects of the project.
10/30/2014-11/06/2014 11/06/2014-11/13/2014 11/13/2014-11/20/2014	10, 11, 12	UI/Usability	Iteration 2 is complete. Present. Complete any outstanding development and correct any critical defects. Consolidate ui’s stylistically (multiple devs)
11/20/2014-11/26/2014	13, 14	Acceptance Testing	Finish all testing and defect fixing and prepare for final presentation.
12/04/2014			Iteration 3 is complete. Present.

Quality Assurance Plan

Defect management and testing will be performed at 3 layers:

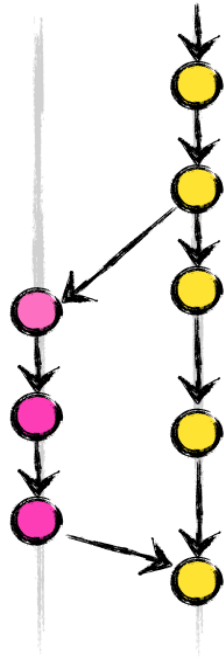

- Client Layer (UI elements..)
- Middle Layer (Business Logic/Rules)
- Storage Layer (Database schema, Triggers, Functions, Procedures ..)
